

2013 IPM Internships

Texas AgriLife Extension Service and Texas Pest Management Association

Number Available: Up to 9

Majors Eligible to Participate: IPM, Entomology, Soil and Crop Sciences, Plant Pathology and related agricultural majors.

Student Classification Eligible: Sophomores, Juniors, Seniors

Job Responsibilities: Interns have a variety of responsibilities including scouting for pests, providing leadership for other scouts, monitoring plant growth and development, data collection and summarization, assisting with demonstration and research plots. Interns will be expected to write a monthly report and a final report about their internship.

Remuneration: Student is employed by and Extension IPM professional or a local pest management committee. Wages vary but generally are in the \$7.00-\$10.00 per hour range depending upon previous experience. Many Colleges and Universities will provide 3-4 hours of course credit for the internship experience. Please check with your advisor regarding the number of credit hours.

In addition to hourly wages, interns who successfully complete the internship and meet the objectives of the internship will be paid a training stipend at the end of the season.

Location of Internship: Various locations around the state. Exact locations will be determined by April, 2013.

Length of Internship: This will vary somewhat depending upon location but will roughly begin after the end of the spring semester and end when classes begin in the fall. The internships generally last 10-16 weeks depending upon location.

If interested please send your resume to: Dr. Charles Allen, Extension IPM Coordinator, 7887 U.S. Highway 87 N., San Angelo, TX 76901. For questions call (325)653-4576 or e-mail ctallen@ag.tamu.edu. An application and more information can be found at <http://ipm.tamu.edu> under Internships.
